October, 14, 2016

Advanced Integration – a more robust *education offering* for your practice

- ✓ Your practice gets their own on-line Patient Education account supporting:
 - Access to your customized education documents (SaveNotes)
 - Free text search for education
 - Favorites folders (Hot lists)
 - Add additional text “on-the-fly”
 - Your customized Header and Footer on each document
 - Header and Footer can be unique to each office location
- ✓ Document retrieval from CPS/C-EMR opens in the CareNotes browser
- ✓ Customized “problem to education document” mapping
- ✓ Permanent retention of documents in a PDF format to a user designated directory
- ✓ Supports Meaningful Use compliance within GE

Your Practice Benefits

Saves Providers Time

- A **single call** to the CareNotes browser for all patient visit education documents, including co-morbidities, medication handouts, surgical procedures and laboratory information
 - Current approach is one condition → one document
- “Patient Condition” to “education handout” mapping – means you get what you need each time every time without having to search for anything

Your Practice Benefits

Best Practices are easily supported - consistent education information across your practice using the mapping/indexing capabilities

Custom content and custom header and footers – supports your practice's policies and procedures

Rapid clinician adoption – the access and provider workflow will not change

Permanent document retention – supports defense against claims

Implementation Program

- Implementation is fast and easy:
 - Download Proxy Server software to your GE test environment
 - Enable Truven access to your test system
 - We complete technical configuration, set-up and Initial testing
 - Your practice will system test and sign-off
- Early Adopter Slots are still available
